CONTENTS
for Volume 199

No. 1, August 2000

RESEARCH NOTE

Bolton, Toby F., Florence I. M. Thomas, and Celere N. Leonard
Maternal energy investment in eggs and jelly coats surrounding eggs of the echinoid *Arbacia punctulata* 1

PHYSIOLOGY

Johnson, M. L., P. M. J. Shelton, E. Gaten, and P. J. Herring
Relationship of dorsoventral eyeshine distributions to habitat depth and animal size in mesopelagic decapods 6
Dietz, T. H., A. S. Udoetok, J. S. Cherry, H. Silverman, and R. A. Byrne
Kidney function and sulfate uptake and loss in the freshwater bivalve *Toxolasma texasensis* 14
Vollmer, Steven V., and Peter J. Edmunds
Allometric scaling in small colonies of the scleractinian coral *Siderastrea siderea* (Ellis and Solander) 21

DEVELOPMENT AND REPRODUCTION

Torrado, Mario, and Alexander T. Mikhailov
Frog Lim-1-like protein is expressed predominantly in the nervous tissue, gonads, and early embryos of the bivalve mollusc *Mytilus galloprovincialis* 29
Gibson, Glenys D., and Jennifer M. L. Harvey
Morphogenesis during asexual reproduction in *Pygospio elegans* Claparede (Annelida, Polychaeta) 41
Watson, G. J., F. M. Langford, S. M. Gaudron, and M. G. Bentley
Factors influencing spawning and pairing in the scale worm *Harmothoe imbricata* (Annelida: Polychaeta) . . . 50
Buckland-Nicks, John, and Alan N. Hodgson
Fertilization in *Callochiton castaneus* (Mollusca) 59
Hirose, M., R. A. Kinzie III, and M. Hidaka
Early development of zooxanthella-containing eggs of the corals *Pocillopora verrucosa* and *P. eydouxi* with special reference to the distribution of zooxanthellae 68

CELL BIOLOGY

Wakefield, Timothy S., Mark A. Farmer, and Stephen C. Kempf
Revised description of the fine structure of *in situ* "Zooxanthellae" genus *Symbiodinium* 76

ECOLOGY AND EVOLUTION

Barnes, David K. A., and Mathew H. Dick
Overgrowth competition between clades: implications for interpretation of the fossil record and overgrowth indices 85

* * *

Annual Report of the Marine Biological Laboratory R1

No. 2, October 2000

RESEARCH NOTE

Hourdez, Stéphane, Jason Lamontagne, Pat Peterson, Roy E. Weber, and Charles R. Fisher
Hemoglobin from a deep-sea hydrothermal-vent copepod. 95

PHYSIOLOGY

Marsh, Adam G., Patrick K.K. Leong, and Donal T. Manahan
Gene expression and enzyme activities of the sodium pump during sea urchin development: implications for indices of physiological state 100
Hill, Richard W., John W.H. Dacey, and Ahser Edward
Dimethylsulfoniopropionate in giant clams (Tridacnidae) 108

ECOLOGY AND EVOLUTION

Baker, Shirley M., Jeffrey S. Levinton, and J. Evan Ward
Particle transport in the zebra mussel, *Dreissena polymorpha* (Pallas) 116
LaJeunesse, T.C., and R.K. Trench
Biogeography of two species of *Symbiodinium* (Freudenthal) inhabiting the intertidal sea anemone *Anthopleura elegantissima* (Brandt) 126

NEUROBIOLOGY AND BEHAVIOR

Rosenthal, Joshua J.C., and Francisco Bezanilla
Seasonal variation in conduction velocity of action potentials in squid giant axon 135

DEVELOPMENT AND REPRODUCTION

Misamore, M.J., and J.W. Lynn
Role of the cytoskeleton in sperm entry during fertilization in the freshwater bivalve *Dreissena polymorpha* 144

SHORT REPORTS FROM THE 2000 GENERAL SCIENTIFIC MEETINGS OF THE MARINE BIOLOGICAL LABORATORY

Featured Report

The Editors
Introduction to the featured report. On mapping odor quality 161
Wachowiak, Matt, Michal Zochowski, Lawrence B. Cohen, and Chun X. Falk
The spatial representation of odors by olfactory receptor neuron input to the olfactory bulb is concentration invariant 162

Neurobiology

Landowne, David
Heavy water (D_2O) alters the sodium channel gating current in squid giant axons 164
White, Thomas H., Harris Ripps, Miduturu Srinivas, and Roberto Bruzzone
Voltage gating properties of channels formed by a skate retinal connexin 165
Molina, Anthony J.A., Peter J.S. Smith, and Robert Paul Malchow
Hydrogen ion fluxes from isolated retinal horizontal cells: modulation by glutamate 168
Wang, Jing W.
Odor-induced oscillatory activity in *Drosophila* CNS ... 170
Hitt, James M., Frederick A. Dodge, Ehud Kaplan, and Robert B. Barlow
Circadian rhythms in the receptive fields of the *Limulus* lateral eye 171
Fay, Richard R., and Peggy L. Edds-Walton
Frequency response of auditory brainstem units in toadfish (*Opsanus tau*) 173
Yamaguchi, Ayako, Leonard K. Kaczmarek, and Darcy B. Kelley
Intrinsic membrane properties of laryngeal motoneurons that control sexually differentiated vocal behavior in African clawed frogs, *Xenopus laevis* 175
Atherton, Jillian L., Matthew A. Krutky, James M. Hitt, Frederick A. Dodge, and Robert B. Barlow
Optic nerve responses of *Limulus* in its natural habitat at night 176
Krutky, Matthew A., Jillian L. Atherton, Spence Smith, Frederick A. Dodge, and Robert B. Barlow
Do the properties of underwater lighting influence the visually guided behavior of *Limulus?* 178
Hale, Melina E.
Startle responses of fish without Mauthner neurons: escape behavior of the lumpfish (*Cyclopterus lumpus*) 180
Epstein, David A., Herman T. Epstein, Frank M. Child, and Alan M. Kuzirian
Memory consolidation in *Hermissenda crassicornis* ... 182
Abenavoli, A., L. Forti, and A. Malgaroli
Mechanisms of spontaneous miniature activity at CA3-CA1 synapses: evidence for a divergence from a random Poisson process 184

Physiology and Biochemistry

Novales Flamarique, Inigo, Kristiina Ovaska, and Theodore M. Davis
UV-B induced damage to the skin and ocular system of amphibians 187
Harrington, John M., and Peter B. Armstrong
Initial characterization of a potential anti-fouling system in the American horseshoe crab, *Limulus polyphemus* 189
Asokan, Rengasamy, Margaret T. Armstrong, and Peter B. Armstrong
Association of α_2-macroglobulin with the coagulin clot in the American horseshoe crab, *Limulus polyphemus:* a potential role in stabilization from proteolysis 190
Kuhns, William J., Max M. Burger, Mohan Sarker, Xavier Fernandez-Busquets, and Tracy Simpson
Enzymatic biosynthesis of N-linked glycan by the marine sponge *Microciona prolifera* 192
Armstrong, Peter B., and Rengasamy Asokan
A Ca^{+2}-independent cytolytic system from the blood of the marine snail *Busycon canaliculum* 194
Heck, Diane E., Lydia Louis, Michael A. Gallo, and Jeffrey D. Laskin
Modulation of the development of plutei by nitric oxide in the sea urchin *Arbacia punctulata* 195

Jung, Sung-Kwon, Katherine Hammar, and Peter J.S. Smith
Development of self-referencing oxygen microsensor and its application to single pancreatic HIT cells: effects of adenylate cyclase activator forskolin on oxygen consumption 197
Hanselmann, Rhea, Roxanna Smolowitz, and Daniel G. Gibson
Identification of proliferating cells in hard clams. . . 199
Brothers, Christine, Ernest Marks III, and Roxanna Smolowitz
Conditions affecting the growth and zoosporulation of the protistan parasite QPX in culture. 200

Cell Biology

Sandberg, Leslie, Phillip Stafford, and George M. Langford
Effects of myosin-II antibody on actin-dependent vesicle transport in extracts of clam oocytes 202
Stafford, Phillip, Jeremiah Brown, and George M. Langford
Interaction of actin- and microtubule-based motors in squid axoplasm probed with antibodies to myosin V and kinesin 203
Tran, P.T., V. Doye, F. Chang, and S. Inoué
Microtubule-dependent nuclear positioning and nuclear-dependent septum positioning in the fission yeast, *Saccharomyces pombe*. 205
Crawford, Karen
The role of microtubules during blastodisc formation of the squid *Loligo pealei*. 207
Weidner, Earl
Cytoplasmic proteins on the surface of discharged microsporidian sporoplasms 208
MacKenzie, Roger, David Newman, Max M. Burger, Rene Roy, and William J. Kuhns
Adhesion of a viral envelope protein to a non-self-binding domain of the aggregation factor in the marine sponge *Microciona prolifera*. 209
Goda, Makoto, Mario H. Burgos, and Shinya Inoué
Fertilization-induced changes in the fine structure of stratified *Arbacia* eggs. I. Observations on live cells with the centrifuge polarizing microscope 212
Burgos, Mario H., Makoto Goda, and Shinya Inoué
Fertilization-induced changes in the fine structure of stratified *Arbacia* eggs. II. Observations with electron microscopy. 213
Gould, Robert M., Concetta M. Freund, John Engler, and Hilary G. Morrison
Optimization of homogenization conditions used to isolate mRNAs in processes of myelinating oligodendrocytes 215

Ecology, Biogeochemistry, and Population Biology

Kirkby, Ryan, Luc Claessens, Charles Hopkinson, Jr., Edward Rastetter, and Joseph Vallino
Modeling the effects of land-use change on nitrogen biogeochemistry in the Ipswich watershed, Massachusetts 218
Perring, Anne, Michael Williams, Charles Hopkinson, Jr., Edward Rastetter, and Joseph Vallino
Solute dynamics in storm flow of the Ipswich River Basin: effects of land use. 219
Westgate, Elizabeth J., Kevin D. Kroeger, Wendy J. Pabich, and Ivan Valiela
Fate of anthropogenic nitrogen in a nearshore Cape Cod aquifer 221
Denault, Michelle, Erica Stieve, and Ivan Valiela
Effects of nitrogen load and irradiance on photosynthetic pigment concentrations in *Cladophora vagabunda* and *Gracilaria tikvahiae* in estuaries of Waquoit Bay. 223
Greenbaum, Adena, and Anne Giblin
Differences in properties of salt marsh sediment between hayed and reference sites 225
Chikarmane, Hemant M., Alan M. Kuzirian, Robbin Kozlowski, Mark Kuzirian, and Tony Lee
Population genetic structure of the goosefish, *Lophius americanus*. 227

Oral Presentations

Published by title only. 229

No. 3, December 2000

EVOLUTION

Rinkevich, B.
A critical approach to the definition of Darwinian units of selection 231

NEUROBIOLOGY AND BEHAVIOR

Leise, Esther M., and Michael G. Hadfield
An inducer of molluscan metamorphosis transforms activity patterns in a larval nervous system 241
Finley, Luke, and David Macmillan
The structure and growth of the statocyst in the Australian crayfish *Cherax destructor*. 251

Jury, Steven H., and Winsor H. Watson III
Thermosensitivity of the lobster, *Homarus americanus*, as determined by cardiac assay 257
Cromarty, S. I., J. Mello, and G. Kass-Simon
Molt-related and size-dependent differences in the escape response and post-threat behavior of the American lobster, *Homarus americanus* 265

CELL BIOLOGY

Baghdasarian, Garen, and Leonard Muscatine
Preferential expulsion of dividing algal cells as a mechanism for regulating algal-cnidarian symbiosis. 273

DEVELOPMENT AND REPRODUCTION

Kominami, Tetsuya, and Hiromi Takata
Cellular basis of gastrulation in the sand dollar *Scaphechinus mirabilis* 287
Vickery, Minako S., and James B. McClintock
Effects of food concentration and availability on the incidence of cloning in planktotrophic larvae of the sea star *Pisaster ochraceus* 298
Dickinson, Amanda J. G., Roger P. Croll, and Elena E. Voronezhskaya
Development of embryonic cells containing serotonin, catecholamines, and FMRFamide-related peptides in *Aplysia californica*. 305

RESEARCH NOTE

Takeda, Naokuni
Development of a penis from the vestigial penis in the female apple snail, *Pomacea canaliculata* 316

* * *
